DIY CRAFT: Hanging decorations

OBJECTIVE: Create your own foil balloon decorations

Materials

- 1 x deflated foil balloon
- string
- glue
- scissors

Instructions

1. Measure out 90cm piece of string and cut this.
2. Grab the foil balloon and, with scissors, carefully cut out a few shapes. There must be 2 identical versions of each shape (keep these together as it could otherwise get confusing later).
3. Once the shapes have been cut out, glue one side of the foil shape (the side you do not wish to see).
4. Start at one side of the string: lay the string on top of the shape with glue on.
5. Using the other identical shape, seal the string in-between the two shapes.
6. Continue doing this all the way down to the end of the string, leaving a gap between each.
7. The end piece will be a string of decorate shapes that can be used as decoration!

Top tip

If using a coloured foil balloon, you can alternate between the silver colour on the inside of the balloon and the outside.

Need some free balloons for your lessons? Contact us on info@partysafe.eu. Please keep the fun in balloons and dispose of them correctly. For more information and educational resources, please visit www.partysafe.eu.
